

Aquatread K9-2300 Pro

- 1) The most comprehensive and practical underwater treadmill in today's market, was inspired by and developed with a professional rehabilitation veterinarian, catering for all possible needs & wants.
- 2) Built from heavy duty 316 Marine grade stainless steel for industrial use – complete with every possible feature built in and integrated. Nothing EXTRA is needed or can be added. This machine was designed and built for the professional in physical rehabilitation & hydrotherapy. Featuring a walking belt length of 2.0m, built-in adjustable counter-flow jets, robust remote control & touch screen display, a comfortable lightweight sit-down seat to fit over the belt, adjustable therapist booster steps, a handy storage tray behind, walking platforms outside, an overstep for front feet resting and many more!
- 3) The only machine that has all the functions operating in both walking directions.
- 4) Some machines have low voltage underwater motors (for safety reasons), but high voltage inline heating elements in the water system – we use a totally safe and electricity efficient heat pump and a triple insulated/ earth leakage protected, safe electrical system.
- 5) If required any electrical maintenance can be done by your local electrician.
- 6) Pump & filter maintenance can be done by yourself or a local plumber & irrigation contractor.
- 7) The treadmill belts can be ordered from any local conveyor manufacturer near you – belts usually lasts 4-5 years or longer.
- 8) We use a larger water storage tank – a greater volume of stored water gives you cleaner water for longer & also spare water in case of an emergency dumping.
- 9) The UV light in the filter system reduces chlorine usage by about 70% making the water much softer on the skin, especially for dogs with allergies.
- 10) Very fast, high volume water pumps for pumping in & out, with a special hair filter built into the system.
- 11) The **Industrial marine grade Stainless Steel body of your machine has a lifelong warranty** and we will replace broken parts at any stage, normal wear & tear considered. All other components have the manufacturers guarantee as supplied to us.
